

Technical Specifications Crude Soybean Oil (CSBO)

UKRAINE

DESCRIPTION

Crude degummed soybean oil (CDSO) is a pure but inedible soybean oil produced from regular to medium quality crude soybeans. Most of the free fatty acids and gums naturally present in soybeans are removed by hydration and mechanical or physical separation.

CHEMICAL CHARACTERISTICS

Moisture & Volatile Matter	0.20% Max
Lecithin (expressed as Phosphorus) basis 0.020%	0.025% Max
Sediment (Gardner break test)	0.10% Max
Impurities (Insoluble in petrol ether)	0.10% Max
Color (Lovibond cell 1 inch) Basis	Not darker than 50 yellow plus 5 red
Unsaponifiable Matter (test as per N.S.P.A)	1.50% Max
FFA (As oleic with molecular weight of 282) Basis 1.00%	1.25% Max

THESE MAY BE SUBJECT TO MINOR MODIFICATIONS TO BE SPECIFIED IN THE CONTRACT

Possibility of packaging with the customer's brand with minimums and conditions to be determined.
